

Video Enhancer - Setup Guide

made by @codex_here

Yeh guide aapko sikhayegi ki Video Enhancer script ko apne naye laptop me kaise setup aur use karna hai. Sab steps simple hain, bas neeche follow karo.

Requirements (Zarooratein)

- Python 3.10 ya usse upar (3.10+)
- opencv-python library
- numpy library
- Windows PC (recommended)

Step 1: Python Install Karo

1. Browser me jao aur yeh link kholo: <https://www.python.org/downloads/>
2. 'Download Python' button pe click karo (latest version le lo, 3.10+).
3. Installer open karo.
4. IMPORTANT: Neeche 'Add Python to PATH' checkbox ko ZAROOR tick karo!
5. 'Install Now' pe click karo.
6. Installation complete hone do.

Step 2: Dependencies Install Karo

1. Start menu me 'cmd' search karo aur Command Prompt kholo.
2. Yeh command type karo aur Enter dabao:

```
pip install opencv-python numpy
```

3. Thoda wait karo, libraries download ho jayengi.
4. 'Successfully installed' dikhe toh sab sahi hai.

Step 3: Script Download Karo

1. Browser me yeh link kholo:

[youtube-automation-bot/feature/video-enhancer-gui/
video_enhancer.py](https://youtube-automation-bot/feature/video-enhancer-gui/video_enhancer.py)

<https://>

2. Page pe code dikhega - Right click karo aur 'Save as' select karo.
3. File ko Desktop pe save karo.

4. File name 'video_enhancer.py' hi rakhna.

Step 4: Script Run Karo

1. Command Prompt kholo (Start me 'cmd' search karo).

2. Desktop pe jao yeh command se:

3. Ab script run karo:

4. Ek window (GUI) khulegi jisme sab options honge.

Step 5: Script Kaise Use Karo

1. 'Browse' button pe click karo aur apni video select karo.

2. Jo effects chahiye wo checkboxes tick karo (neeche details hain).

3. Enter key dabao ya Start button pe click karo.

4. Processing shuru ho jayegi - progress bar dikhega.

5. Complete hone pe enhanced video same folder me save hogi.

Features (Effects) Explained

1. Super HDR: Video ki brightness aur contrast improve hoti hai. Colors zyada vivid dikhte hain. Har frame sharper lagta hai.

2. Color Enhancement: Colors ko aur rich banata hai. Saturation badhata hai, video zyada attractive dikhti hai.

3. Minor Zoom: Video me thoda sa zoom add karta hai (subtle crop effect). Professional look deta hai.

4. Random Zoom In/Out: Randomly video me zoom in aur zoom out hota hai. Dynamic feel aata hai, boring nahi lagta.

Output (Result)

- Enhanced video 'video_enhanced.avi' naam se save hogi.

- Format: AVI (XVID codec) - Windows me direct chalegi.

- Windows Media Player me play kar sakte ho.

- VLC Player me bhi chal jayegi.

Troubleshooting (Problems & Solutions)

Problem: 'pip' is not recognized

Solution: Python install karte waqt 'Add to PATH' tick nahi kiya hoga. Python dubara install karo aur is baar checkbox zaroor tick karo.

Problem: 'python' is not recognized

Solution: Same issue - PATH me Python nahi hai. Reinstall karo with 'Add to PATH' checked. Ya phir 'python3' try karo command me.

Problem: Module not found error

Solution: Dependencies install nahi hui hain. Step 2 dubara follow karo:
pip install opencv-python numpy

Problem: Video nahi khul rahi enhanced

Solution: VLC Player install karo (free hai). AVI format VLC me achhe se chalta hai.

Problem: Script GUI nahi khul raha

Solution: Tkinter usually Python ke saath aata hai. Agar error aaye toh Python reinstall karo aur 'tcl/tk' option checked rakhna installer me.
